MUSA KHAN

Software Developer

+92 313 5546356 | musakhanx76@gmail.com | Islamabad, Pakistan | linkedin.com/in/musakhanx76 | musakhanx76.github.io

PROFESSIONAL SUMMARY

Computer Science graduate (Hazara University) with hands-on experience building full-stack applications end to end, from Flutter/Dart interfaces to Python/Django backends and PostgreSQL databases. Built SmartAttendance_FYP, an AI-driven attendance app for 40+ users that cut manual processing time by 93%, and CoinVault, a real-time cryptocurrency tracker. Currently building QistFlow, a multi-tenant installment ERP system. Comfortable designing schemas, writing SQL, debugging across the stack, and picking up new languages quickly.

EDUCATION

Bachelor of Science in Computer Science
Hazara University | Mansehra, Pakistan | Sep 2022 – Jul 2026

EXPERIENCE

Flutter Developer, Hazara University Software Development Lab Jun 2025 – Apr 2026
Mansehra, Pakistan

- Built Flutter/Dart UI components for mobile app projects, connecting front-ends to backend services via REST APIs.
- Used Git and GitHub for version control across lab and coursework projects.

TECHNICAL SKILLS

- Programming Languages: Python, Dart, JavaScript (basic, HTML/CSS/JS fundamentals from coursework)
- Databases: PostgreSQL, SQL (schema design and querying)
- Backend: Django, Django REST Framework
- Mobile: Flutter
- AI & Computer Vision: OpenCV, dlib, face_recognition
- Tools & Version Control: Git, GitHub

PROJECTS

SmartAttendance_FYP: Final Year Project *github.com/musakhanx76/SmartAttendance_FYP_Development*
AI-driven mobile attendance application with real-time face-scanning recognition.

- Built a cross-platform Flutter app with real-time AI face recognition (OpenCV, dlib, face_recognition) for 40+ users, cutting manual attendance processing time by 93%.
- Designed RESTful API endpoints (Django REST Framework) and a PostgreSQL schema to handle authentication, attendance records, and AI-model communication.

CoinVault: Real-Time Crypto Tracker *github.com/musakhanx76/CoinVault*
Real-time cryptocurrency tracking application built with Flutter and Dart.

- Built a Flutter dashboard consuming the CoinGecko REST API for live prices and market trends, with interactive charts (fl_chart) and a cached watchlist (shared_preferences).
- Managed asynchronous data states, loading indicators, and network error handling using Provider.

QistFlow: Multi-Tenant Installment ERP & Ledger Engine (In Progress)
Hire-purchase and serialized inventory ERP system for retail appliance merchants. Tech: Django, DRF, PostgreSQL, Flutter.

- Building a multi-tenant hire-purchase and serialized inventory ERP system, with a financial math engine for custom markup tiers and automated payment schedules.
- Designing an ACID-compliant ledger pipeline for cash payment allocation and automated inventory-to-customer ownership transitions.

CERTIFICATIONS & CONTINUOUS LEARNING

- Getting Started with Flutter & Dart, Packt (via Coursera), 2026
- Introduction to Flutter, Simplilearn, 2026
- Certificate in Web Designing (HTML, CSS, JavaScript fundamentals), FiveD Official, 2022
