

Musa Khan

Flutter Developer Intern Candidate

+92 313 5546356 | musakhanx76@gmail.com | Mansehra, Pakistan | linkedin.com/in/musakhanx76 | musakhanx76.github.io

PROFESSIONAL SUMMARY

Computer Science graduate (Hazara University) with hands-on Flutter development experience gained through university lab work and independent projects. Built SmartAttendance_FYP, an AI-driven attendance app for 40+ users that cut manual processing time by 93%, and CoinVault, a real-time cryptocurrency tracker consuming live market data. Skilled in building cross-platform mobile interfaces with Flutter, integrating REST APIs, and working with backend services built on Django REST Framework and PostgreSQL. Comfortable owning a feature end-to-end and picking up new tools quickly.

EDUCATION

Bachelor of Science in Computer Science

Hazara University | Mansehra, Pakistan | Sep 2022 – Jul 2026

EXPERIENCE

Flutter Developer — Hazara University Software Development Lab

Mansehra, Pakistan | Jun 2025 – Apr 2026

- Built and refined Flutter/Dart UI components for mobile app projects as part of ongoing lab work.
- Practiced connecting mobile front-ends to backend services and databases, including REST API integration.
- Used Git and GitHub for version control across lab and coursework projects.

TECHNICAL SKILLS

- Mobile / Frontend:** Flutter, Dart
- Backend:** Django, Django REST Framework (DRF)
- Databases:** PostgreSQL
- AI & Computer Vision:** OpenCV, dlib, face_recognition
- Tools & Version Control:** Git, GitHub

PROJECTS

SmartAttendance_FYP — Final Year Project

github.com/musakhanx76/SmartAttendance_FYP_Development

AI-driven mobile attendance application with real-time face-scanning recognition.

- Developed a cross-platform mobile application in Flutter, designing an intuitive UI/UX for 40+ end users to mark and track attendance in real time.
- Architected and implemented RESTful API endpoints using Django and Django REST Framework to handle authentication, attendance records, and AI-model communication, reducing manual attendance processing time by 93%.
- Integrated an AI face-scanning module using OpenCV, dlib, and the face_recognition library into the application pipeline, enabling real-time user identification and automated attendance logging with high accuracy.
- Designed and managed a relational database schema in PostgreSQL to efficiently store and query user, session, and attendance data.
- Maintained version control and collaborative workflow for the full codebase using Git and GitHub, ensuring an organized commit history and reproducible builds.

CoinVault — Real-Time Crypto Tracker

github.com/musakhanx76/CoinVault

Real-time cryptocurrency tracking application built with Flutter and Dart.

- Built a responsive mobile dashboard consuming the CoinGecko public REST API to display live prices, 24-hour market movement, and 7-day historical trends.
- Rendered interactive price trendlines using the fl_chart package.
- Implemented client-side search filtering and local caching with shared_preferences to persist a user's favorite watchlist.
- Managed asynchronous data states, loading indicators, and network error handling using Provider.

CERTIFICATIONS & CONTINUOUS LEARNING

- Certificate in Web Designing — FiveD Official, 2022
- Flutter Certification — Simplilearn (In Progress, 2026)
